

**LUCARA**  
DIAMOND

## **Mineral Resource Manager**

### **Term: Full time**

Company: Lucara Diamond Corp.

Location: Vancouver, Canada

Lead the evaluation of opportunities that create significant value for Lucara Diamond Corp. The Karowe diamond mine, located in Botswana, is a state-of-the-art mine which was fully commissioned in Q2 2012. Karowe, which means precious stone in the local language, is a large-scale asset with tonnage and throughput upside and is one of world's foremost producers of large, high quality, Type IIA diamonds in excess of 10.8 carats, including the historic 1,758 Sewelô, the 1,109 carat Lesedi La Rona and the 813 carat Constellation.

### **Responsibilities:**

- Develop and implement strategies for mineral resource optimization
- Monitor and analyze production data to optimize resource extraction
- Conduct economic evaluation of deposits and commercial opportunities
- Provide leadership in the areas of Resource Estimation, Resource Valuation, Technical Due Diligence, Financial Modeling, Business Analysis, and Commercial aspects
- Demonstrate an out-of-the-box or entrepreneurial thinking approach to identify and suggest alternative development approaches, upside opportunities, or commercial pathways that may deliver additional value to Lucara Diamond
- Provide economic discipline for Lucara Diamond's projects.
- Deliver high quality insights through economic analysis and valuation of deposits to guide in execution plans that can create significant value
- Commercial evaluation of projects and targets for Lucara Diamond, including valuation, economic analysis, benchmarking, and conceptual studies
- Project and benchmarking to identify how projects compare on various technical and financial metrics
- Evaluation and preparation of reporting for various stakeholders
- Provide technical expertise and guidance to cross-functional teams.
- Participate in Merger and Acquisition (M&A) due diligence

### **Requirements:**

- Bachelor's Degree in Geology or Geological Engineering
- Minimum of 7 years' experience in the mining industry, including 3 years as a Resource Geologist.
- Must meet the qualifications to be determined a Qualified Person (QP) under National Instrument 43-101
- Specialized knowledge of diamonds and diamond mining and processing methods to effectively generate conceptual mine plans and test alternative development scenarios
- Ability to breakdown and communicate complex conclusions to senior leadership
- Understanding and practical experience of mine economics, financial modelling and evaluation techniques
- Proactive, adaptable, and able to thrive in a fast-paced mining environment
- Regular travel to the site; twice per quarter

**LUCARA**  
DIAMOND

- Fluent verbal and written English language skills
- A criminal record check will be required as a condition of employment.

This position offers an opportunity to contribute to mineral resource function, support decision-making processes, and drive efficiency and profitability. If you are a self-motivated with a passion for geology within the mining sector and a desire to make a meaningful impact, we encourage you to apply.

To apply, please submit your resume and cover letter to [info@lucaradiamond.com](mailto:info@lucaradiamond.com).
